

My Experience with a Suspected Coronavirus Strain...

Hello all!

OK, in the followings, I'll try to describe the major points that led me to conclude I may have been affected by the damned thingy.

First, the premises I take as given:

- From Sue Arrigo's case 26 "Your sickness and genocide": [Link to Post #28 \(here\)](#)
 - "The US Administration has been making many new germs and using the vaccines only for their own use. The HIV virus is a BioWarfare germ which was developed at Fort Detrick.

'Over the past two decades there have been only a handful of other physicians and health professionals who have had the courage to alert the public to evidence that AIDS is man-made (namely Robert Strecker MD, William Campbell Douglass MD, Eva Snead MD, and Leonard G Horowitz DDS)' and Dr. Alan Cantwell author of Queer Blood.

<https://web.archive.org/web/20080519002629/http://dark-truth.blogspot.com/2007/06/more-evidence-hiv-was-man-made-bio.html>

It was tested under the supervision of CIA officer Jim Jones on US blacks, hispanics, and Native Americans at **Jonestown** British Guiana. **I met Jim Jones in the halls of the CIA after that.** He did not die in that CIA mass murder atrocity that killed over 900 people. Most were not so well mind controlled as to 'voluntarily commit suicide on cue'. Please read the book "Was Jonestown a CIA Medical Experiment? by Robert Meier for more information. HIV did not accidentally escape from Fort Detrick; it was intentionally used to target populations, mainly blacks and Third World people. For example, **HIV infected units of blood were sent to sickle cell clinics in Africa, put in vaccines used in Africa, India, Thailand, etc. But, infected blood was also wittingly sent by the Shadow govt. to Canada with the intention of infecting that population as well.** **The Robber Barons only consider the top 500 wealthiest families in the world to be "their own". In their agenda, they want to allow each of those families to have a million relatives on the face of the earth and wipe out all the other people.** That can be done by creating new germs and taking safe vaccines to them, while withholding those vaccines from everyone else. Thus, they have developed a vaccine against HIV which they have taken but hidden from the rest of the world. In my report to Tenet, I stated that this was a crime against humanity which was being perpetuated on a daily basis. After he read my report, I asked him what he was going to do about all those crimes against humanity, as each new germ represented one. He hemmed and hawed and then offered lamely that he was not the one making the decision. I asked him who was. He did not answer that question directly. He said, "Well, you can come with me to the next Presidential briefing in the morning and discuss it with Bush, if you think that it will do any good."

I doubted it would do any good, but in the interests of thoroughness I did it anyway. I took with me a large stake of my report. My report was over 225 pages with a couple hundred pages of supporting documents. So, each report was almost a ream width of paper. I put 10 of them in a box to take with me. Both Cheney and Bush were at that Presidential briefing that morning. And Rice was called into it when I started giving my briefing on the poor quality of the research done at the BioWarfare Labs. At the end of my almost 12 minutes, I concluded with my recommendation that all the labs be closed down.

Bush, Jr. said to me, "We wanted to know how to make the research more effective. What are your recommendations to do that?"

I asked him, "More effective in what way?" That was a loaded question because they did not want to come out and say in front of the many foreign bugs likely to be in the Oval Office, "At killing off most of the people in the world so we can have all the resources of the planet for just our own children." So, there was a brief uncomfortable silence.

Then Cheney said, "You know what we want. What do we have to do to get the level of science up to be able to accomplish it?"

I started off on the tangent of how to make the research safe enough to even do and recommended tongue in cheek that it at least be moved off shore to join their investments. Rice laughed at that. The others did not. **They wanted the BioWarfare Labs on US soil to be able to claim an accidental release when one was intentional.** That suggested to me that Rice was not as close into the loop on the actual agenda as the others.

Cheney then said to me "Just get to the point and tell us what needs to be done to get the kill ratios up to usable to immobilize a whole population."

I said, "Of healthy well fed soldiers or starving villagers?"

He said, "Assume a healthy population'.

Then **Bush, Jr. added in "What does it take to kill everyone who isn't vaccinated?** Can't we just use several germs at the same time?"

Cheney frowned at that because Bush had said more than was wise for plausible deniability. He tried to cover for Bush and added, "In the event of war."

I said, "We are in a war now. It is likely that Middle Easterners have different susceptibility rates than Westerners."

Bush, Jr. said, "Well, we want to be able to cover all bases."

Tenet rolled his eyes up to the ceiling at Bush's continued faux pas.

Rice tried to rescue him this time and said, "This is just theoretical so that we understand all facets of the problem."

Bush leapt back in and said, "No, I really need to know in case I decide to launch this globally."

Cheney got up and left the room, apparently because Bush had said too much and he didn't want to be implicated by what else Bush said. But that did not help Cheney because the next thing that Bush, Jr. said was 'Cheney and I already discussed this before you came this morning and we are of the same mind on it. **We want the capacity to wipe out all of the "lesser beings" on the planet.'**

I played dumb and asked him how he defined that.

He said, "You know, **all those who are not members of the CFR already**"

"And their families?" I offered.

"Well, not all of them," he said. "**You know The List.**"

I handed him a copy of it to make sure that we were talking about the same list. He nodded yes, and repeated "What do we have to do to get down to just those people?"

I told him that their current plans were not good because the science was so faulty that even if you used multiple germs that those people had already received the vaccines on, that the number of people left alive were likely to overwhelm all defenses and overrun and kill the perpetrators.

"That means us, doesn't it?" he asked.

Rice was shifting uncomfortably in her chair--apparently she knew that her family was not on that list.

I said, "Yes. And I don't think that you can improve the research quality at the Labs without inspiring a culture of honesty in them first."

"How do we do that?" he asked.

"Leadership" I replied. "Model the behavior that you want them to have by being honest."

"What about incentives? Cash incentives?", he asked.

"You already have such a system in place. The researchers know that they can get an extra \$100,000 by creating a new germ. It is not improving the quality of the research, it is only making more germs."

"But then we will succeed by having lots of them!" he asserted.

"No, lots of them are "me too" germs and they can cause the body to develop immunity to many of the other germs in the program."

"Then we can imprison all those who don't do good research, to improve the quality. How long should they be imprisoned for?"

"I really don't think that will work either", I said. "They will get more devious, but not more honest."

We went around in circles like this for a while. Finally, Tenet said it was getting late.

Bush ended by saying, "I don't think my being more honest is a good idea. People would find out the truth. I think that you better explain this to Rockefeller as I sure don't want to have to. He is going to be very disappointed in you. You are failing to make this work the way we want it to. I don't think that will be good for your health, if you keep on resisting us in this."

Cheney came back in as Tenet and I were about to leave. I gave him, Bush, and Rice copies of my report. I also left a copy for Rumsfeld, the Head of the JCS, and others until I had none left.

Cheney said, "You expect us to read this?" I said, "The first 5 pages are the executive summary. The rest is to prove what I said in those 5 pages."

Bush said, "Oh, I can read that much" and picked his copy back up off the side table he had set it on. Then he said to me vehemently, "This better deliver what I want or you will be sorry when Rockefeller hears of it."

Cheney said to Bush, "Don't worry. We have others to replace her."

The next month they had 3 other people review the BioWarfare Labs' research without first giving them my report. Those 3 people said much the same that I did--the science at the BioWarfare Labs was seriously flawed and untrustworthy.

Since the Shadow Govt. intends to make new germs to kill off 11 out of every 12 people, without exempting Americans, please inform your friends and neighbors to mobilize to stop. Use non-violent protests like Martin Luther King, Jr. taught us to do. There is still enough time. **The poor science at those BioWarfare Labs means that the Shadow Government cannot count on a single of their exclusive vaccines**

working well to protect them. All they have is Yes men saying they will work. They are poorly tested because they wanted to hide the fact that they have made those germs. What they have is a 3-Stooges type of genocide by germ warfare plan.

The US Administration has not even been able to get the Iraqi people clean water and electricity after 5 years. Hitler was able to consolidate his gains into workable occupations and move onto invading the next country using his success in the first countries. The current administration does not have the skill needed to have a single successful occupation after more time than the US spent fighting WWII. They think that they can lie their way to success by just declaring "Mission Accomplished".

As I said before, Skull and Bones, the Rockefeller Family and the Illuminati in general worship death and believe that the gods they worship are pleased by it. They believe that their gods grant them favors, such as wealth, in proportion to how well they provide fear, anger, and ritual human sacrifices for them to feed off of. This is standard Aztec human sacrifice kind of magical thinking. Never mind that the Aztecs, the Druids, and Incans, that practiced such human sacrifices were ultimately unsuccessful as societies. They still appealed to the Pirates of Skull and Bones and the pseudo-mystical Illuminati. These people are not scientists. They do not have the patience for. They just want to rape and plunder populations without having to think too much about it."

In 2008, US President George W. Bush presents the Presidential Medal of Freedom to Fauci "for his determined and aggressive efforts to help others live longer and healthier lives."

- From Angelo Roncalli:
 - <http://projectavalon.net/forum4/showthread.php?84115-Angelo-Roncalli-s--Pope-John-XXIII--1935-Prophecies&p=983842&viewfull=1#post983842>
 - "At night, the great removal. The two men who thought themselves masters of the world, brought before the tribunal on the largest square in the world,

before men of the earth and pursued by those who have rebelled. Scientists, condemned by them to slavery through their power to put their talents at the service of death, will be the accusers."

- From a Cassiopaeian session: [Session 21 March 2020](#)
 - **"A:** The virus did not appear first in China. There were experiments at Fort Detrick regarding the creation of a vaccine that would make humans more controllable. This vaccine had unexpected effects and in some cases did the opposite of what was intended. The strain escaped into a population and further mutated. Indeed it was carried to China by US soldiers. China soon knew the type and origin and launched a massive campaign to control the situation. This was seen by Western powers as a good model to follow with additional add-on factors. In the meantime further mutations have occurred, some engineered via STO forces by virtue of the virus taking hold in certain persons whose spiritual force was able to direct the progression. At this point, there are two major strains. The elite need to stop the spread of that which they "created"."
 - (Gaby) But that means this virus has been out there in the world for awhile now...

(Andromeda) How long has it been circulating?

A: More than two years.

Now, my experience per se:

For quite a while before ending up at the hospital's emergency ward, I had more and more difficulties undertaking any kind of efforts without having to "catch my breath" like even walking 10 paces. However, "catching my breath" was a misnomer because I could breathe full pulmonary capacity but it was taking longer and longer to reset and make another 10 paces... along with being more and more wobbly on my legs. That perplexed me quite a bit:

- I could breathe but the energy to keep walking was taking longer and longer to feed my muscles.

Around that same time, my neighbor mentioned that he too was experiencing difficulties with sustained effort and having to "catch his breath" to keep going... so he went to see his physician who told him from the result of a blood sample that his red cells count was quite low and prescribed him iron supplements which seemed to handle his problem...

So, once in the hospital, I ended up in the Pneumo ward and then was in Isolation with nurses and visitors having to wear masks and gloves because no one could pinpoint what I was suffering from beside a phlebitis and the femoral veins blood clots which could generate a pulmonary embolism (<https://www.thefreedictionary.com/embolus>) but there was also some lungs symptoms which could be akin to some Tuberculosis and whatever, hence the isolation.

Then the hospital switch to another one with better equipments and staff where isolation was carried on until it was determined I wasn't, in anyway, contagious, via endoscopy, etc...

Finally, I got out of there before the "real" corona virus hit France and the subsequent lockdown.

Actually, I couldn't relate my hospital experience with the covid until this one came out:

<https://vimeo.com/402537849>

Dr. Cameron Kyle-Sidell.

According to Dr. Kyle Sidell, COVID-19 is an **"Oxygen Deprivation Disease"** dissimilar from Pneumonia or ARDS (Acute Respiratory Distress Syndrome)

And the clincher came with this one:

<https://www.henrymakow.com/2020/04/pandemic-gifted-Italy-to-China.html>

by Paolo

(henrymakow.com)

[...]

"Some Italian doctors, doing many autopsies on corpses of people who died of coronavirus, found that **the virus does not cause pneumonia but thrombosis to the pulmonary artery** which are easily mistaken for pneumonia.

"In other words, people have died because they were [treated] for the wrong disease. Coronavirus causes cardiovascular failures, not pulmonary ones.

"Trump was right: Hydroxychloroquine is really a game changer. In the first phase of the disease, patients must be [treated] with Hydroxychloroquine; only if the situation worsens is it necessary **to use heparin in order to liquefy the blood.**"

[...]

Voilà ...

From there, the orchestration of mass hysteria and the creation of that crisis out of thin air following the well grooved formula of "Problem – Reaction – Solution" onto which Rahm Emanuel's MO is grafted:

"You never let a serious crisis go to waste. And what I mean by that [is:] it's an opportunity to do things you think you could not do before."

The whole thing was admitted by Pompeo with his "*an exercise gone live*"... "they" had a spectrum of simulations and drills at the ready to chose from to satisfy maximum yields for multiple outcomes. I.e., the pandemic wasn't supposed to happen before the vaccine was worked out at Fort Detrick... but it leaked out and became a "Me Too" germ as Sue Arrigo put it... and, for all "their" intents and purposes, was a dud (lethality barely equal to, or even less than, a regular flu)... so, the next best thing for plausible deniability was to send it to Wuhan via inept, non-competitive US soldiers; next to a level 4 Bio-lab while Fort Detrick was shutdown for safety issues.

From there, "their" ready made music sheets for "their" philharmonic orchestration were handed to the media (you know... copy cats of "Putin's Missile") and the orchestra is still playing its cacophonic symphony.

Now, there is something of a glitch somewhere: how the hell did I get to catch that damned thingy since I was already living like a hermit for a long while and 5G is nowhere near this part of France? Accordingly, was what I experienced something due to a coronavirus strain or a mere run of the mill blood infection/inflammation? But, then, the latter doesn't explain my neighbor's similar symptoms.

I hope the above can help sort out some confusions inserted via too many misdirections and distractions.

Love to all and my heartfelt thanks for your support and get well wishes during my hospital journey, be cautious and get and/or stay well!

PS: According to Jim Stone:

To fight disinfo, FOR THE RECORD:

This outbreak was caused by a virus that has embedded in its code what is called a "P-shuttle sequence" which is what Crispr uses to embed code, and this occurs ONLY when Crispr is used.

BLAME CHINA, don't even think about pointing the finger at Ft. Detrick like I did in mid February.
