

Benjamin Fulford 08/11/2025. Latest news.

Are the Trump and Netanyahu avatars under the control of the forces of good again?

Something fundamental seems to have happened in the balance of power in the US and the world over the past week, and the White Helmets seem to be back in control. While it's too early to say for sure, Israeli Justice Minister Benjamin Netanyahu and President Donald Trump have certainly found new scriptwriters over the past week.

Trump has suddenly gone from talking about an "extreme threat" to arranging a meeting with Russian President Vladimir Putin. He now plans to bring peace to Ukraine by handing over significant Ukrainian territory. Netanyahu has gone from saying that "Israel intends to control all of Gaza" to saying that he would prefer neighboring Arab countries to take responsibility for the Palestinian enclave.

Remember when Netanyahu was hospitalized recently? Judging by his

sudden turn of events, it looks like they have once again switched roles in this ping-pong power struggle.

It may seem like a small thing, but when I tried to transfer money from a Canadian bank to a US bank over the weekend, I got a message saying "this country is not available," suggesting that some kind of reset of the financial system is underway. This could be related to Trump's imposition of tariffs on gold imports in an attempt to prevent the Federal Reserve's magic printing press from being replaced by an asset-based financial system.

As a result, U.S. gold futures hit record highs on Friday, making physical gold more expensive in the U.S. than anywhere else and likely sparking a boom in gold smuggling.

Regardless of what happens, the general consensus among market watchers now is that some kind of financial black or white swan is approaching.

For example, Edward Dowd predicts a housing market crash, a 50% stock market drop, and a recession that has already begun. In the interview linked below, he also explains why a reset of the monetary system is inevitable and why gold should be included in the new system.

In any case, according to several sources, the sudden reversal in the positions of Netanyahu and Trump certainly foreshadows serious changes this fall.

With the US fiscal year ending on September 30, the US regime is trying to force everyone from Russia to India to Brazil to Venezuela to hand over huge amounts of gold and cash. If this does not happen, we may see the final collapse of the Khazarian mafia's control over the US.

That is why the Trump-Putin summit on August 15 is likely to be a decisive moment. We already know from our own sources, as well as from several media leaks, that Trump has agreed to hand over a significant part of Ukraine to Russia. And, according to MI6 sources, a decision has been

made to sacrifice Ukrainian dictator Volodymyr Zelensky.

However, the transfer of territories alone will not be enough to conclude a deal. Russia is demanding the creation of war crimes tribunals. "Member states of the Organization for Security and Cooperation in Europe (OSCE) should familiarize themselves with the facts about the atrocities committed by the Ukrainian armed forces against Russian civilians and prisoners of war, which are published in the quarterly reports of the Russian Foreign Ministry on the crimes of the Kyiv regime," said Russian Foreign Ministry spokesperson Maria Zakharova.

Independent researchers claim that 1.8 million Ukrainian men have died in this war. "In Luhansk alone, Ukraine lost 19,877 men in July. That's 641 soldiers a day, and that's in ONE region. This is a genocide of the Ukrainian people, carried out by NATO and the United States," says Warren Thornton.

THE NUMBER OF DEAD PEOPLE CANNOT BE CONFINED ANYMORE

From our friends in Ukraine we have data on the number of deaths in only one region for July 2025.

We reported that 1.8 million people died fighting for NATO and America on Ukrainian soil, an average of 1,638 deaths per day for...

— Warren Thornton (@ThorntonWa47373) August 5, 2025

After killing the men of Ukraine, the KM turned their women and children into slaves. Hundreds of thousands of children were tortured to death in Ukraine to obtain adrenochrome.

Last week, an Israeli ship carrying the largest cargo of adrenochrome ever recorded by the Russian military was discovered at the Tartus naval base in Syria. Its destination? Hollywood, USA.

The cargo was labeled as "medical humanitarian aid." But inside, Russian

security officials found anything but humanitarian aid. Sealed cryogenic containers, military-grade refrigeration units, and vials with serial numbers linked to secret hospitals in war zones.

Putin's Adrenochrome task force briefed the Kremlin just hours after the arrest. The batch was estimated to have been derived from the blood of at least 10,000 children, many of whom were believed to have been taken from chaotic areas in Ukraine, Syria and the Gaza Strip.

Russia intercepts batch of adrenochrome from Israel containing 'blood of 10,000 children'

We have independently confirmed the People's Voice reports several times. If you don't believe in the existence of adrenochrome, take a look at this disturbing image sent to us by Japanese military intelligence last week. On the left side of the image is high-ranking KM leader Barack Obama Hitler with a young Japanese girl who was given to him as a tribute by the Japanese slave government. We have another image of a girl being exploited for adrenochrome, but due to censorship restrictions we cannot publish it here.

This is certainly an elite drug. Japanese military intelligence reports that one gram of adrenochrome costs \$250,000.

The key to catching these Satanic criminals will be the Epstein case. Last

week, the fake "Trump" called the Epstein case "complete bullshit."

But the Epstein case isn't going away. The latest poll shows that 84% of Americans have heard of it. Also, 45% believe Donald Trump was involved, 29% disagree, and 26% aren't sure. What's important is that the vast majority (77%) are saying, "Show us the evidence," by releasing all the relevant documents.

If authorities don't take action against these mass child killers, it's only a matter of time before lynchings occur. We're seeing early signs of it. Last week, Jeffrey Epstein's former lawyer, Alan Dershowitz, was heckled at a farmers market in Martha's Vineyard on Wednesday after he tried yet again to get a produce vendor to sell him pies.

"My grandparents died in the Holocaust! Don't call me an anti-Semite!" one man fumed, while another market visitor said: "My Jewish culture is a history of resistance to genocide. We are not anti-Semites; we are against the oppression of all people."

Then the crowd around the pierogi stand began chanting, "Time to go!" and customers shouted, "Leave her alone!", "There are others who want pierogi!" and "Go home, Alan!"

Unable to obtain a single pie, Dershowitz left the market empty-handed.

Dershowitz, accused of having sex with several of Jeffrey Epstein's underage victims, says 'statutory rape is an outdated concept' and calls on the president to use his authority to lower the age of consent to 14.

Dershowitz was lucky he was just booed. Next time he might get lynched.

Violence against elites like him is on the rise, most recently killing a police officer after a gunman opened fire with a rifle at the Centers for Disease Control and Prevention in Atlanta in retaliation for the COVID-19 vaccine poisoning.

More and more people will take similar actions if justice is not served against vaccinators, etc., mass murderers.

 Americans Say 'No' to COVID Vaccines as Trust in CDC, FDA Falls

 59% of Americans Refuse Fall COVID Vaccination

 Less than half trust CDC/FDA on vaccine safety

 Even The Hill admits it — partly

In this report I analyze the KFF poll, media propaganda and the actions of RF Kennedy Jr.... pic.twitter.com/wsXt3vZez

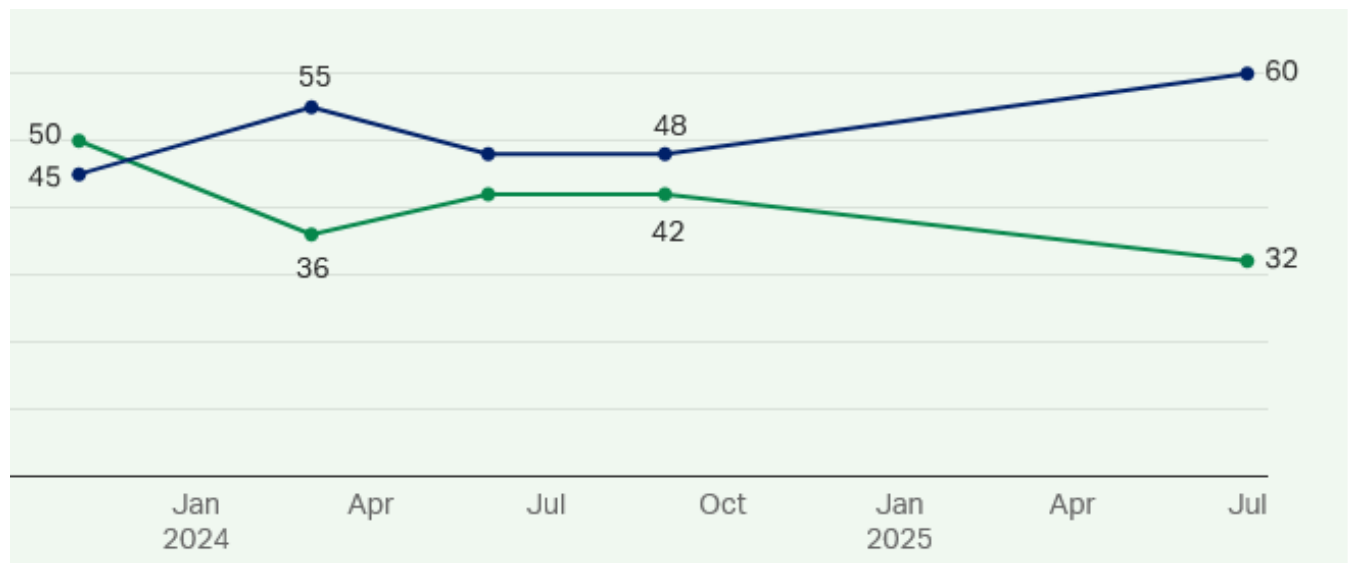

— Jon Fleetwood (@JonMFleetwood) August 5, 2025

The mass awakening has already begun: 59% of American adults said

they "definitely will not" or "probably will not" get a COVID-19 vaccine this fall. Only 21% said they "definitely" will get the shot.

This means that we are now left with only a small remnant of 21% of the population that is still brainwashed by the Cabal.

Another sign that KM has lost its grip on American public opinion is the fact that 60% of Americans oppose Israel's actions in Gaza and only 32% support them, the lowest level since the operation began.

Of course, the KM is extremely dangerous right now, as they are literally fighting for their lives. We are hearing several reports that they will try to kill us all with biological weapons before we can bring them to justice.

It looks like China is under attack again:

Authorities in China's southern Guangdong province have reimposed lockdown and isolation measures similar to those taken during the COVID pandemic to stop a major outbreak of the mosquito-borne chikungunya virus that has already infected thousands of people.

The epicentre of the outbreak is in Foshan, a city 170km north of Hong Kong, where more than half of the nearly 8,000 reported cases have occurred.

It is logical to assume that disease-carrying mosquitoes were released in southern China.

Things could get worse. Japanese military intelligence reports that KM is planning a new biological attack using a synthetic pathogen. They plan to spread the story that global warming has melted the permafrost in Siberia, causing the virus to emerge. They say the real source of the virus is the National Institute of Virology and Materials Science Research Center, better known as the Vector Institute, and the Chinese Ministry of Health.

After I was sent this information, the following news arrived:

Recent events have caused widespread concern in the scientific community after researchers in the field of functional enhancement announced that they had created an untreatable strain of bird flu that has a shocking 100% fatality rate in humans.

Japanese researchers have created an entirely new strain of bird flu, according to a new study published last week in the journal NPJ Vaccines.

They combined genetic material from two separate wild viruses to create what they call Vac-3: a pathogen that is a "reassortant virus between A/duck/Hokkaido/101/2004 (H5N3) and A/duck/Hokkaido/262/2004 (H6N1)».

This lab-created virus, A/duck/Hokkaido/Vac-3/2007 (H5N1), has never been found in nature.

It is alarming that scientists have created a virus that is completely resistant to all types of treatment.

It was artificially produced, grown in eggs, concentrated and inactivated with formalin to convert the whole-particle vaccine into the vaccine used in long-term trials in non-human primates.

McMaster University in Canada is currently developing an "inhaled COVID vaccine." Soon, it will simply be sprayed into the air from airplanes... if that isn't already being done.

And if you're one of the deeply brainwashed 21% of people who believe

vaccines are meant to protect people, then this headline is for you:

"Experts baffle why Haiti has one of the lowest COVID-19 death rates."

Answer: No one in Haiti has received a single dose of the coronavirus vaccine.

KM is also trying to slowly kill us through our food and water.

In France, Nestlé Waters is accused of storing waste and operating four illegal dumps in Contrexieville, Teil-sous-Montfort, Saint-Ouen-le-Parey and Crainvilliers, with a total capacity of 473,700 cubic metres.

Nestlé is accused of allowing "microplastic particles" to enter surface and groundwater at concentrations that "make all aquatic life impossible and have harmful effects on health, flora and fauna."

Another thing the French and others are warning about is that Nestlé is secretly taking control of the world's drinking water. When they "privatize" water, its price increases by 2-5 times, and the company gains control over water, the most important source of life.

Remember, Nestlé's CEO said water is not a basic human right.

Moreover, KM-controlled Israel and the US are the only countries that voted against the UN resolution calling adequate food security a human right.

Instead, they are trying to feed us corpses. They are turning human bodies into liquid form to use as fertilizer. They are trying to force your

children to eat synthetic meat made from aborted fetal cells and human stem cells. Moreover, they are doing this openly in the name of "sustainability," in the name of the sick and Orwellian.

This isn't just a theory. It's already enshrined in American law, legalized in Washington, California, and Oregon, and spreading fast. It's called "natural organic reduction." A seemingly innocuous name that turns the body into compost. The body is shredded, liquefied, chemically treated, and distributed to the plants we eat.

And who do you think funded this policy, wrote the "science" and lobbied legislators?

Bill Gates.

Gates Foundation.

Today, over 30 million acres of farmland in the United States are owned by globalist puppets.

The same man who makes money by pushing toxic injections and mRNA technology on the world and by undermining birth rates now oversees an operation that turns dead people into agricultural material and pretends to save the planet.

Let's look at the evidence:

In 2019, the Washington State Assembly, with the support of Gates-funded climate change organizations, legalized body composting, which was marketed as a "green alternative" to cremation.

In 2021, Gates Breakthrough Energy Ventures doubled down on its investment in "next-generation meat," or meat made from protein grown in synthetic tissues and labs, many of which are derived from immortal human cell lines.

In 2022, several companies, including Upside Foods and Biotech Foods, received funding from Gates and Davos officials to accelerate the

production of cultured meat using stem cells from fetal and body tissue.

An EU document published in 2023 said pharmaceutical proteins from human embryos were mixed with processed foods in experiments.

In 2024, it was reported that British startup Renewal Bio had succeeded in creating an embryo-like structure grown without the use of sperm or eggs, specifically designed for "industrial organ growing" and protein extraction.

And now, in 2025, we are witnessing the complete fusion of food, death and elite control.

This is not food. This is ritualized debauchery, planned cannibalism, spiritual warfare, and biological occupation of the food chain.

They still operate as a sham shadow government, with FEMA-linked strongholds. They promoted "zero-emissions agriculture," criminalized independent ranchers, and bankrupted small farmers. Meanwhile, Gates, Schwab, and BlackRock bought up the land.

It's not just a question of food. It's a question of the dominance of rituals.

To top it all off, KM is once again bringing out its weapons for earthquakes and weather conditions.

It is now clear that the latest attempt to attack Russia's Kamchatka Peninsula with a seismic weapon was intended to pressure Russia into agreeing to a summit between Putin and Trump.

(Updated 8:45 CST) A "planned" earthquake just hit Turkey, next one will be in India, Bangladesh or Burma.

Now, starting August 12, just before the summit, people are being invited to witness real experimental work at the HAARP facility in Hacom, Alaska. So it appears that the summit is being held in Alaska so that the US can show off its HAARP negotiating card. Russia, for its part, is also brandishing secret weapons as bargaining chips. After NATO shocked with its hypersonic missile Oreshnik, Deputy Foreign Minister Sergei Ryabkov said Russia had other modern weapons.

At the same time, Russia is carrying out a major military buildup in Belarus in preparation for the Zapad 2025 military exercises in September. Belarus's neighbors suspect that the current exercises will be used as cover for a larger military invasion of Europe.

In this situation, most Europeans would welcome Russian intervention. As evidence of Russia's claims that the EU is the Fourth Nazi Reich, EU dictator Ursula von der Leyen delivered a truly Orwellian moment by telling a protester about to be arrested: "In Russia, you would be arrested."

In the latest sign of Europe's liberation, nationalist Karol Nawrocki was sworn in as Poland's new president on Wednesday, vowing to defend "sovereign Poland." Nawrocki, an ally of U.S. President Donald Trump, was

elected in June, a major defeat for the government of pro-European Prime Minister Donald Tusk and raising the risk of institutional conflict ahead of parliamentary elections in 2027.

He believes in national sovereignty.

He believes in protecting borders.

He promotes family values.

He openly supports Christianity.

Poles celebrate that they will not become like the West. Since Russia also has a Christian government, rapprochement should be possible, especially after Russia promised Poland to reunite with Lithuania.

Europeans would also like to receive help from Russia in the fight against foreign criminals who now infest most Western cities.

Ireland is a prime example. This side-by-side image beautifully captures the dramatic and alarming changes in public safety in Dublin over the last two decades:

- In 2003, the Irish Examiner named Dublin "one of the safest cities in the world", ranking it 18th in the world - well ahead of many European cities.
- In 2024, the Sunday World included Dublin in the "top ten most dangerous cities in Europe".

What's happened?

- Mass immigration without integration
- Weak enforcement of laws
- Government neglect of rising gang activity and antisocial behaviour
- Housing crisis leading to homelessness and urban decay

- Censor honest reporting before it's too late

The same picture is playing out in most Western cities. The city that once symbolised Irish warmth and charm is now under the spotlight for stabbings, riots and violent crime.

This is what happens when globalist ideology, open border policies, and state-sponsored abandonment of law and order are allowed to prevail.

Ukraine is a shining example of a completely criminal state. Here, the Russians know they have a strong card in their hands. As the official news agency TASS reports:

Ukraine and its Western allies are on the brink of a "humiliating defeat" in the conflict with Russia. Putin has recently ignored all of Trump's ultimatums and deadlines [on Ukraine]. Therefore, a personal meeting is urgently needed.

Russia has some very powerful friends, too. China sent five icebreakers to Alaska for the summit, more than twice as many as the US.

The Chinese say they welcome the summit. China agrees with Western white hats that friendly relations with Russia will benefit everyone. They hope the summit will lead to an agreement to build a tunnel across the Bering Strait, connecting the American continent with the Eurasian one.

In another move partially endorsed by China, Azerbaijani President Ilham Aliyev, Armenian Prime Minister Nikol Pashinyan and Trump announced the creation of a transportation corridor to be called the "Trump Route for International Peace and Prosperity."

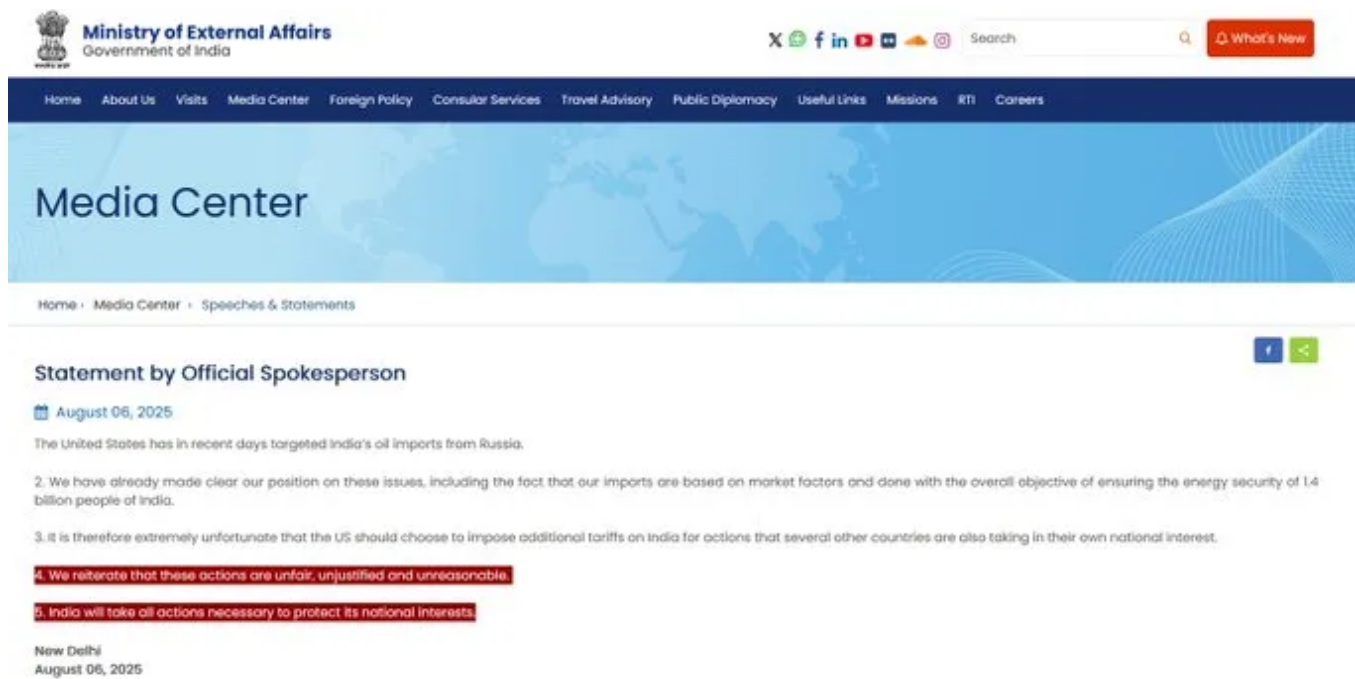

This means that American troops will be stationed near Iran, which will facilitate U.S. and Azerbaijani subversion in northern Iran, where 15-20 million Turkish Azeris live in East Azerbaijan Province, warns Armenian-American intelligence analyst Joachim Hagopian.

In any case, Trump needs to learn that you can catch more flies with honey than with vinegar.

A typical example is the attempt to pressure Russia into making a deal by attacking its allies, which has backfired. India has recently moved closer to the West and away from China. Now Indian Prime Minister Narendra Modi will travel to China for the first time since 2018 to meet Chinese President Xi Jinping at the end of August. This comes after Trump threatened to double tariffs on Indian goods over the country's purchase of Russian oil. The US tariffs of 25% on Indian goods came into effect on Wednesday evening.

India says Trump's tariffs are "unfair, unjustified and unreasonable" and

that it will "take all necessary measures" to protect its national interests.

Statement by Official Spokesperson

August 06, 2025

The United States has in recent days targeted India's oil imports from Russia.

2. We have already made clear our position on these issues, including the fact that our imports are based on market factors and done with the overall objective of ensuring the energy security of 1.4 billion people of India.
3. It is therefore extremely unfortunate that the US should choose to impose additional tariffs on India for actions that several other countries are also taking in their own national interest.
4. We reiterate that these actions are unfair, unjustified and unreasonable.
5. India will take all actions necessary to protect its national interests.

New Delhi
August 06, 2025

One thing they have already done is terminate all arms supply agreements concluded with the United States.

Brazil is also taking a hard line. Chinese Foreign Minister Wang Yi said China supports Brazil in "resisting aggressive tariff measures" and stepping up cooperation with countries in the global south, especially within the BRICS group. Brazil is now threatening to sever all trade relations with the United States.

Russia has also sent special forces to help its ally Venezuela in the fight against new US aggression:

The Trump administration on Thursday doubled the US reward for the capture of Venezuelan President Nicolas Maduro (pictured) to \$50 million, accusing him of being one of the world's biggest drug traffickers and posing a direct threat to US security.

The United States has been trying to overthrow the Venezuelan government for decades, not because Maduro is particularly corrupt, but because Venezuela has the largest known oil reserves on the planet and refuses to hand them over to American companies.

Hugo Chavez and later Maduro took oil from the hands of foreign multinationals, used it to fund social programs, and created alliances with countries like China, Russia, and Iran that are far beyond US control. That is the real "crime."

Hugo Chavez and then Maduro seized the oil...

— Hashim Mteuzi, PMP (@Mteuzi) August 8, 2025

Maybe that's why the US has offered a \$50 million reward for the capture of Venezuelan President Nicolas Maduro? Maduro says:

"Hitler was a construct, a monster created by Western elites... The criminal Israeli military apparatus enjoys the same support, the same funding, the same backing. That is why we say to the Jewish people: it is you who must end this massacre." Maduro, by the way, is Jewish.

Trump also issued a directive giving the U.S. Department of Defense authority to conduct direct military operations against certain Latin American drug cartels classified as foreign terrorist organizations (FTOs).

Mexican cartel sources say the military operation is aimed at restoring CIA

(Cocaine Import Agency) control over the drug trade. All the cartels targeted have stopped paying the CIA "sweep money," the sources say.

They add that the Americans want to destroy natural marijuana crops in order to sell patented synthetic marijuana. They claim that American and European companies created fentanyl to take control of the heroin trade. They point out that their heroin, unlike fentanyl, is organic and plant-based. Now the same companies want to switch to synthetic and potent marijuana.

Finally, this week we note that while the West struggles to rid itself of the transnational criminals who have taken over our governments, China continues to leave us far behind, this time with the help of robots:

The world's first artificial intelligence (AI) store opened in Beijing last week. Exhibits include dancing robot dogs dressed as lions, humanoid robots that can dispense traditional Chinese medicine, and machines that can flip pancakes, brew coffee, throw basketballs, paint, and even navigate an obstacle course.

In 2024, China accounted for two-thirds of all robot patent applications and produced 556,000 industrial robots, meaning the country remains the world's largest manufacturer.

The "ChatGPT moment" for robots could come in the next two to three years, according to Wang Xingxing, CEO, CTO, and founder of Chinese robotics startup Unitree. ChatGPT passed the Turing test in 2024, meaning humans won't be able to tell it apart from a human.

So the Chinese say that in three years there will be robots that we won't be able to tell apart from real people. They may have already installed a Trump robot in the White House. In these strange times, anything is possible.
